[SPECIAL DISPATCHES TO THE RECORD-UNION.]

COOLIES IN ARIZONA. How the Heathen Chinee Evades Uncle Sam's Officials.

PHŒNIX, May 13th.-The unexpected activity shown by Mr. Barry, the new Collector at San Diego, has caused the tide of illicit Chinese immigration to turn toward to reach the line of the Southern Pacific road and thence to the favored points in

California. Only a few days ago eighty-seven Chinese were landed at Guaymas by the Mexican steamer Alejandro, having been brought from Mazatlan, where they were dumped by the Pacific Mail.

It is said that this cargo came by San rancisco, having had passage on the Oceanic. Three days after their arrival at Guaymas thirty four of this consignment again boarded the Alejandro on the latter's return trip to San Diego, and were landed at Ensenada, Lower California, ostensibly for the Lower California Mining Company. The rest at once disappeared from Guay-mas, and the fifty-three, it is believed, are

now enjoying themselves in the various Chinese colonies of the United States. The facts have been brought to the attention of the authorities of the Trritory, and a closer watch will in future be kept on the coolies that may be landed at Guaymas. This Territory is peculiarly good ground for the Chinese to travel over. The Southern Pacific Company is employing large gangs of them as track-repairers, and there is less anti-Chinese feeling here than

anywhere in the West. In Phoenix, for instance, all the restaurants but two are conducted by Chinese and they even have the dining-room of one of the leading hotels on contract. In the public gambling-houses of the city the Chinese "buckers of the tiger" are nine to one to the white man, and the Mongolian and the Caucasian are apparently on terms of perfect equality.

A county official stacking up "reds,"

while ten or a dozen Chinse look on ad-

miringly, is a very common sight, and gen-erally there dosen't appear to be any feel-ing against the coolie. In such a country the Mongolian tourist is not likely to be stopped and questioned, and once over the border is comparatively safe. revenue district, and one of the keenest and most energetic of men having been ap-pointed United States Marshal, a closer

SEATTLE NEWS. Death of a Wealthy Lady-An Attempted

Suicide. SEATTLE (Wash.), May 13th.-Sarah M. Renton, relict of Captain William Renton, died at her residence at Port Blakeley this morning. Her death was due principally to old age, she being in her seventy-eighth year. The immediate cause was a cold which settled on her lungs. Mrs. Renton leaves an estate, the estimated value of which is \$3,000,000. It comprises property in this State, Baltimere, Sacramento and San Francisco. She leaves two daughters,

Mrs. Mary Gaffney and Mrs. D. J. Sack Millie Moran, a disreputable woman, at tempted suicide this afternoon. Jealousy of the attentions of Thomas Moran, her lover, to another woman was the cause. A

There is much rejoicing here over the ter yesterday at Sacramento, when the site selected by the Commission was ap-proved by the Board of Examiners and a warrant ordered drawn for the purchase price. It has been over a year since the Commission was appointed, and people were beginning to fear the asylum never would be built. Work will probably be commenced at once.

Death of W. F. White. Los Angeles, May 13th .- William F. White, the venerable father of Hon. Stephen M. White, died here this morning of apoplexy. He was first attacked about four months ago, and four weeks ago he was brought here. The remains will be taken north and the funeral will be held in Pajaro valley, near Watsonville, on Thursday, in a little church built there many years ago by deceased. He was 74 years of age and was born in Ireland. He came to America at the age of four and to Califor-nia in 1849. His home for many years past has been in East Oakland and San Francisco. On Trial for Wife-Murder. Jackson, May 13th .- The trial of Domenico Bacigalupi for poisoning his wife by strychnine in September last com-menced yesterday. Two days have been occupied in getting a jury. Nearly 100 jurors are present to select from. One is lacking to complete the jury, who will probably be secured to-night. The case licits much interest. A large number of

witnesses are present, several from beyond the county.

Grass Valley Notes. GRASS Valley, May 13th.—The Grass Valley Extraction Company has been formed in Edinburgh, Scotland, to erect and maintain works in Grass Valley for the treat-ment of ores and concentrators.

Over \$600 in purses are offered for the races at the annual fair to commence August 19th. An examination for entrance to the State University will be held here June 25th, 26th and 27th, and an examination for enrance to the Normal School on June 20th and 21st.

Admission Day. San Francisco, May 13th .- The joint committee of Native Sons held their initial meeting this evening to make arrange-ments for the celebration of Admission Day. Five delegates from each parlor were present. W. H. Chamberlain, after a spirited contest, was elected Chairman. W. H. Weston, of El Dorado Parlor, was chosen Vice-President and R. P. Doolan,

Secretary.
The Chinese Removal. San Francisco, May 13th.—The proceedings to test the Bingham ordinance, reating to the removal of Chinamen from the heart of the city to South San Francisco, were begun to day by the arrest of Chae Yuen for failure to comply with it. Shortly after his arrest the Chinese Consul secured a writ of habeas corpus from the United States District Judge.

Disastrous Runaway SAN JOSE, May 13th.—Emery E. Allison, aged about 21 years, while driving a four-horse team through East San Jose this afternoon, lost control of the team, which ran away, throwing him out and fatally injuring him. Women Return Umbrellas "Did you ever know a woman to fail to return a borrowed umbrella?" asked a

dealer in these articles addressing a reporter. "I can't say I ever did." "Nobody else ever did," said the dealer, emphatically. "I have been a long time in the business of selling them, and I have made a special study of women in connection with the borrowed umbrella phase of social ethics, and I have yet to learn of a case where she has abused the confidence eposed in her when she was lent an um brella to protect herself in a sudden shower. She either returns it in person, or sends it with verbal or a pretty note of thanks at the first opportunity. When a man comes in here to buy an umbrella and get chatting with him, I ask the ques-

Louisville, May 13th .- As the great race for the Derby comes near at hand, the in-terest evinced in it is evident on every hand, and although the prospects seem to indicate that it will be decided on a heavy track, this does not lessen its importance one iota to the almost numberless racing class that have gathered, and are hourly arriving in the city. At the track everything is a scene of bustle and activity. At this writing up-wards of 400 horses are quartered here, and

THE KENTUCKY DERBY.

at least 75 more will arrive from Lexington to-night or in the morning. At the board to-night only six horses are bulletined as starting in the Derby, making it the smallest field, save in 1880, that has ever gone to the post in this classic race. What is lacking in number is made up in quality, and the field as a whole is a fairly good one, sufficient to insure a great con-test and a determined finish, which should be to the last moment in doubt.

Riley and Robespierre will divide the favoritism when the track odds are put up to-morrow, but no horse in the race will be more heavily backed than Bill Letch. er's, whose followers fail to figure how he can lose. On paper he seems to have a great chance, his recent work having been more satisfactory than any colt as a starter, not even excepting Riley and Robespierre Prince Fonzo has also been going like great guns, but outside of his stables few believe he will be able to stick out the Derby course. The Methodist Church Asks for Two NEW YORK, May 13th .- The Board of Bishops of the Methodist Episcopal Church closed its session to-day. Assignments to the fall conference were made and Bishop P. Newman was appointed to visit Japan and hold a conference there in July. Regarding the proposed establishment of a national university in Washington, resolu-tions were adopted commending the project. The resolutions add: "It is our judg-ment that an endowment of at least two nillions of dollars and suitable buildings in addition should be procured before the proposed university should be put in operation. In view of the local demand in all parts of the country for emergent needs of already existing institutions, we must look chiefly for a proper endowment for the proposed national university to our friends to whom God has entrustrd large wealth,

THE NEW JUVENILE INSTITUTION.

The San Francisco Alta comes to the front in a sensible and vigorous article against maintaining the new Amador State institution for youths as a reform school. It well says that we need to train children, not to reform them. It enters several protests that are well taken, but unfortunately the Alta is too late. Why did it not step and whether any were born blind or deaf behind him, in the hope of placing him single-handed and alone, was battling for all the press of the State protested against the whole scheme of the Preston School the law. We held that the Massachusetts system, the only correct one-that is to say, it is opposed to the institutional idea wholly. Its aim is to secure for deserted children, and those manifesting a wayward spirit, or who have been guilty of slight offenses. homes and employment far distant from their old associates. These children should not be cooped up in an institution one moment longer than is necessary to ascertain what is the best thing to be done with them. They become wards of the States but they should not be known as having any relation to a reform or State institution. They should be branded by no uni-

form, and not raised up as reformed youths. The new institution is to be under the direction of the State Board of Prison Directors, and however faithfully those well-intentioned and humane gentlemen may serve, and however they may endeavor to lift the school, the simple fact that the State Prison administration is the school administration will brand the new institution with an ineffaceable stigma of shame. The Alta says of the institution:

It is to turn the young aside from the path which leads to the State Prison. Its method should leave no stain upon those with whom it deals. It should not be in any sense a jail, and should have none of the prison air and tone about it at all. Therefore let it not have the State Prison Board to manage it. \* \* \* Can't society see that the beginning of evil in a boy is in his not being permitted to satisfy his ambitions to be a being permitted to satisfy his ambitions to be a being permitted. less to consider his reformation. What the boy needs is right training. Let him have contact with manly occupations and imitate them ac-cording to his years and strength. So let us call cording to his years and strength. So let us call this a school and legislate "reform" out of its title. Next, as to its buildings. If there is to be the usual large dormitory, to mass hundreds under one roof, like prisoners in a cell-room of a prison, let us hope that some boy will burn it down. The buildings should be cottages, grouped around a plaza, with a school-house handy, and a general dining-room. In these cottages the boys should be housed, by dividing them in families, and over each family should be put a good woman, of mature age and motherly heart. This brings home influ-

But the better plan is to have even the cottages serve as temporary homes only; done would be the employment of State agents, who would hunt out good homes useful occupations and have the paternal to build up these youths into good selfupon that plane that Massachusetts moves in her care of wayward children, and she has not failed in three per cent. of her cases. We have one Industrial School in this State now under State control, and its record is a hissing and its name a byword in the mouths of men. If the law is broad enough to permit the Board of Control to relieve the new school from the institutional character as far as possibly can be will find that the terror the gallows indone, then there may be some hope for the experiment. done well. It is the opinion of the great majority of the Judges, and of all the officials of that State having charge of prisons, that to repeal the capital punishment Act would not be humane; that the interests of society demand that the terror of death by execution be kept before the eyes of the lawless as a punishment for the crime of murder. While it is admitted that the purpose of the law in inflicting punishment for crime is not vengeful, and that the end sought is more restraint than expiation, we believe it is true that the death penalty is a greater deterrent than imprisonment for life. We believe that the abolition of the death penalty would result in the loss of many innocent lives that would otherwise be spared by reason of the terror the instrument of execution inspires. Life under any conditions whatever, and always with the hope of freedom, is more tolerable, in the estimation of the criminal, than death inflicted by the arm of the law. Life imreceivers so to speak. It is indeed urious study to observe the extent to which communities acquire and maintai certain industrial characteristics. A few concur in the Assembly bill abolishing examples of wealth suddenly acquired in stock raising, or mining or fruit-growing are sufficient to set the currents of all ommunity life drifting in that direction. A few examples of successful fruit-raising in a community will cover the landscape with orchards. It is for this reason far more than any other climatic difference that fruit-growing, stock-raising and wheat raising are grouped over the surface of the State. I do not wish to be understood in this as saying that mining might be prac ticed in a wheat-growing section, or wheatgrowing followed to advantage to the foot-I am simply indulging in a general

An Astonishing Offer-Some of the Replies.

The San Francisco papers of recent date ontained the following offer: — "As an evidence of the ability of Joy's Vegetable Sarsaparilla to prevent sick headaches, we will give to the first twelve responsible persons who will apply at our office a bottle free if they will agree that after they have been cured that they will admit the fact over their signatures." t over their signatures.'

This offer so startlingly asserted the efficiency of the remedy that many accepted, and the letters of the parties, nearly all of whom responded, are probably the most convincing attestations that any remedy ever received. The following is a sample of those received: -

those received:—

I have been subject to bilious headaches and constipation for several years past; in fact, have been compelled to take a physic every other night or else I would have a headache and dull, mean feeling. I have taken that bottle of Joy's Vegetable Sarsaparilla, and have derived great benefit from it, and intend continuing it. After my own experience I can heartily advise those troubled with biliousness and constipation to try it. Yours, CHAS. E. ELKINGTON.

Governor To-Day. The Governor opened up his office last evening at the State Capitol to receive a delegation of San Franciscans who were coming up to plead for the pardon of ex-Clerk McCarthy of the Supreme Court, who was convicted in San Francisco about money and sentenced to ten years' impris-onment. Since his conviction McCarthy has been confined in the County Jail in that city.

The train which was to have brought up

the delegation was delayed at Sussun, and being informed that it would not arrive here before midnight, the Governor resolved to close up his office and hear the petitioners this morning at 9 o'clock. A RECORD-UNION reporter talked with an attache of the office on the subject, and from the tenor of his remarks the under-standing is that the Executive has resolved to grant the pardon to-day. The gentle-man said he believed McCarthy had been punished enough by two and a half years' confinement in the County Jail. He thought the man really deserved a pardon, and strongly intimated that the Governor thinks so too.

ENTERTAINMENT ORDINANCE NO. 257.

In Ordinance Froposing a Special Electhe Qualified Electors of the City of Sacramento, the Proposition of Incuring Indebtehness for the Purpose of Improving the Streets of the City of

THE BOARD OF TRUSTEES OF THE CITY of Sacramento do ordain as follows:
Section 1 It is hereby determined by the Board of Trustees of the City of Sacramento that the public interest demands the improvement of the streets of the city of Sacramento, and that to make and carry out said improvement of the streets, it will be necessary to incur an indebtedness on the part of the city; that the improvement of the streets will promote and advance the interests and comfort of said city; that the estimated cost of such improvement will be \$10,000; that the manner of improving said streets shall be designated and described in an ordinance calling such special election to be hereafter published.

Section 2. It is further considered that the cost of the improvement of said streets is too great to be paid out of the ordinary annual revenue and income of the city provided for such purposes.

great to be paid out of the ordinary annual revenue and income of the city provided for such purposes.

Section 3. The Board of Trustees of the city of Sacramento shall, after the publication of this ordinance for at least two weeks in the Daily Bee, a newspaper published in the city of Sacramento, cause to be published an ordinance passed in conformity to the provisions of Section 2 of an Act of the Legislature of this State, entitled an "Act Authorizing the incurring of Indebtedness by Cities, Towns and Municipal Corporations, Incorporated Under the Laws of this State," approved March 19, 1889, calling a special election and submitting to the qualified electors of the city of Sacramento the proposition of incurring the indebtedness for the purpose set forth in this ordinance. The said ordinance so calling the said special election shall be published once a day for ten days in the Daily Bee, a newspaper printed and published in the said city of Sacramento, and shall recite the purpose for which the said indebtedness is proposed to be incurred, in accordance with the provisions of Section 2, of the Act of the Legislature of this State, approved March 19, 1889, hereinbefore mentioned.

Section 4. The polling places for said election shall be designated in the notice of said special election hereafter to be published.

Section 5. The election shall be held and conducted in accordance with the laws of the State of California relating to elections.

Section 6. This ordinance shall take effect and be in force from and after its passage.

Of Running a City on the Windmill Idea -He Votes Against a New Sewage Pump.

There was a special meeting last evening of the City Board of Trustees to receive and act upon the report of City Engineer Pierson, giving an estimate of the cost of a proper pump to rid the southwestern part of the city of surplus drainage and sewage, the pump now in use having been found unfit for the work and constantly requiring repairs.

When the members of the Board had taken their seats, Mayor Comstock was observed to wear a serious expression. And his looks did not belie him, for he had no sooner seated himself than he informed Trustee Wolf that he thought the latter owed him an explanation.

still thought the old pump could be made to answer the purpose, and that the city should not incur any more expense.

In regard to the expense of running the pump, Clerk McKee said the expense last year was about \$1,700.

Engineer Pierson said there would be so much more sewage to handle this year that the expense would probably reach \$2,000. He never liked the present pump.

Mr. McLaughlin said he didn't want to take any chances of the pump breaking down, and moved that the Board purchase a pumping outfit, to cost not over \$1,700 complete.

Mr. McLaughlin said he did not like this half-way style of doing business. He did not want, because the matter came within his department, to have to bear more than his share of public criticism, in case everything did not work satisfactorily.
"I don't think it is right, Mr. Mayor," said he, "for you to sit there and vote against everything that costs the city a dollar. The drainage and sewage must be got rid of, and we must have the necessary machinery to handle it."

SOME MORE ECONOMY. Mayor Comstock said a proposition had been made to have the ordinance providing for the bond election published in both daily papers. He thought it should have wide publicity, but didn't like the idea of having to pay for it.
"Why wouldn't it do," he asked, "to have it published five times in the RECORD-

Union, instead of ten?" Trustees Wolf and McLaughlin both said they thought that, in the matter of so important an election, the publication should be in both papers for the full time, and not restricted to one, like ordinary city adver-

Mayor Comstock remarked that by advertising the ordinance but five times \$35 could be saved. "And \$35 comes in pretty handy sometimes," he added, "when you are short of money."

Trustee Wolf had already made a motion

to have the ordinance advertised as proposed for ten days.
"Well," said the Mayor, "call the roll on Mr. Wolf's motion.

AT THE ART GALLERY.

### New Arrangement in the Cabinet-The School of Design-Etc.

At the Art Gallery there is considerable activity just now. The Ladies' Museum Association has just placed a new scholar in the School of Design, a lad whose first efforts have surprised the instructors, and evidence the discovery of a possible genius. Mrs. E. B. Crocker has also placed a new scholar in the school permanently for a

The scholars of the school, who are working very hard, are now agitating a scheme to take the last weeks of the present term for a trip to the mountains to study nature in her own field. It is supdefense in a Broadway saloon, he took the posed that for transportation and board at the Summit the entire cost per pupil will be \$25 for the two weeks. But it is hoped to secure some reduction on this figure. The idea is to have the entire school go to the Summit and study mountain scenery for full two weeks, and thus at one and the same time have a summer vacation and improve it by delightful study. If there are any scholars, however, who cannot go because unequal to bearing the expense, the assistant instructor will remain and devote himself to them, but the desire is that Instructor Jackson shall accompany the classes to the Summit. The hotel at that place has agreed to give the scholars special low rates. Mr. Jackson says that two weeks in the upper Sierras will be worth three months in the class-room to

In the lecture-room of the Art Gallery the Trustees of the State Mineral Cabinet the Trustees of the State Mandageme. have just had placed a new and handsome, though small, case in which are exposed some fine specimens, and among others a cast of the recent areolite of Washington. This new cabinet was made from the re-mains of one of the old ones that was necessarily cut into two parts on removal from the Capitol. But it is a far handsomer case than the original one, and if all the cases could be reconstructed in like manner the public could view the cabinet specimens to

much greater advantage.

Applications have been made from abroad for leave to copy pictures in the Art Gallery. Pending action by the Board of Joint Control, the executive of the Museum Association has refused the applications on the ground that to permit copying now would cheapen the gallery, also that it is possible the gallery may be illustrated by photogravures before long, and to permit copying now would tend to defeat the

The matter of the petition of Mrs. Margaret Schmitzer for a modification of the The capacity of the Y-street pump is about 120,000 gallons per hour. In the year 1889 the pump was operated 120 days, on an average of 12 hours per day, and cost the city about \$1,800, or at the rate of \$1.50 per hour.

This year there will be 20 per cent. more sewerage to handle, and the pump will have to average 14 hours per day for 120 days in order to keep the sewerage down. This, at the same rates, will cost \$1,636 for the year.

A high-lift pump will do the same amount of work in about seven hours per day, as it has a capacity of 270 gallons per hour, thereby saving for the city between \$800 and \$000 per year.

The girl, it seems, had first gone to her parents and made the first false statement. The parents became indignant and caused Domentini's arrest. Then the girl was called upon to reiterate her statement, and, earing the wrath of her parents, she did so, adding her oath to the perjured story.

Domentini had friends, and faithful ones, who never forsook him in his hour of trouble. They left no stone unturned to ecutive. They wanted Wm. Oberst, who is been consigned to San Quentin they continued their efforts in his behalf. Foremost of these friends was A. Mazzini, a prominent member of the local Italian colony, and O. Riccomi, a San Francisco erchant. Messrs. Mazzini and Riccomi procured the assistance of C. Shumaker, a well-known legal gentleman of San Francisco, and all were tireless in their exer-

Right eventually asserted itself, and Mary Wiedeman confessed that she had sworn falsely. While confined in the city prison in August, 1889, with another girl of further commutation of the sentence or a her stripe named Cora Mains, she told the latter that Domentini was innocent, and that she was very sorry that she had been the means of sending the poor fellow to prison. She gave as her reason for perjur-ing herself that she feared the displeasure fession, and when the Chief questioned Miss Wiedeman she readily agreed to make a sworn statement to the effect that Domen-

I have become convinced that the evidence of Mary Weideman, the said witness, was largely untrue, and that the defendant should not have been convicted. It has raised so serious a doubt in my mind as to the justness of the verdict and sentence that I feel satisfied the defendant should be given the benefit of that doubt, and for that Angelo Domentini, whose petition for pardon

Mary Wiedeman disappeared shortly after making her confession, and it was as ertained subsequently had left the State. The Governor, in issuing the pardon, says: "From the affidavits and statements made in this case it appears that the prose-cuting witness, Mary Wiedeman, perjured herself while on the witness stand; that she was in reality a depraved and immoral character, instead of an innocent and abused girl as she would have it appear, and that she met and had intercourse with Domentini of her own free will and accord that Domentini is innocent of any crimi nality, and is unjustly imprisoned; that all of these facts have come to light since the

A telegram was received from Suisun, however, stating that it was ex-pected that the derailed cars and engine would be on the track again in three or four hours after the wrecking train arrived.

The 6:50 train for the Bay was held at Elmira, and its engine went down to the wreck and hauled the coaches and sleepers of No. 4 back to the same station, where the passengers could enjoy more comfort.

Senator Jones Pinishes His Argument on the Silver Bill.

MARION BIGGS ON SWEET OIL.

He Claims More Protection, and Proclaims Himself an Independent American.

[SPECIAL DISPATCHES TO THE BECORD-UNION.]

### CONGRESSIONAL.

Washington, May 13th.—Among the petitions resented and referred was one by Quay from the business men of Philadelphia remonstrating the business men of Philadelphia remonstrating against the increased duty on dress goods made wholly or partly from wool.

The Committee on Pensions reported back the House substitute for the Senate dependent pension bill and moved that it be not concurred in. Agreed to

The Senate then resumed the consideration of the silver bill, Jones of Nevada continuing his speech began yesterday.

the silver bill, Jones of Nevada continuing his speech began yesterday.

Senator Jones opposed the idea of redeeming Treasury notes in bulion on the ground that when they were so redeemed monetary circulation would be contracted, and putting bullion on the market would not make up to the country for the loss of money from circulation. He expressed entire confidence in the honesty of purpose and the conscientiousness of the propurpose and the conscientiousness of the mo-tive of the present Secretary of the Treasury, but he said as none of the Secretaries for twelve years past had coined a dollar of silver more than compelied by law to do, future Secretaries might conscientiously deem it their duty to keep in circulation the least possible amount proposed of Treasury notes, and thus the United States might in effect become a mere purchasing agent for the East India Company or for syndicates of English merchants wanting bullion cheap, in order to make their payments to India in gold by reason of its greater value. Notwithstanding all the legislation in its favor, it could never become the common money medium of the world. Silver is the money medium of the world. If there was any conceivable necessity for the demonetization of either metal, why demonetize that which promised the greater and more steady yield? It was absolutely vital to the welfare of society that both silver and gold should be in full and unlimited use as mouey, and equally invested with power as a legal tender.

In conclusion he said: "I predict, Mr. Presi-

In conclusion he said : "I predict, Mr. President, that the restoration of silver to its birth-right will mark an epoch in the history of this Republic. It will place in circulation an amount of money commensurate with our in-creasing population. It will give assurance to our languishing industries that the volume of creasing population. It will give assurance to our languishing industries that the volume of our circulation medium is not to continue shrinking, and that the tendency of prices shall no longer be downward. It will increase the wages of labor and the prices of the products of labor and the prices of the products of labor. It will reduce the price of bonds and other forms of money securities. It will lighten, but not increase largely, though not upjustly, the debt-paying and tax-paying power of the people. It will loosen the grasp of the creditor from the neck of the debtor. By the remonetization of silver money will cease to be the object of commerce, and will again become its beneficent instrument of activity and will replace stagnation. This movement will supplant inertia with courage, will banish fear with confidence, will dispel doubt with hote, will supersede despair. The lifting up of silver to its rightful place by the side of gold will set in motion all the latent energies of the people. It will banish involuntary idieness by putting every willing man to work. It will revive business and reanimate the heart and hope of the masses.

"Capital, no longer fearing a fall in prices, will turn into productive avenues. The hordes of money lying idle in bank vaults will come out to bless and enrich alike their owners and the community at large, while millions of dollars now invested at low interest in gilt edged securities will seek a more profitable investment in the busy fields of industry, where they will be utilized in the payment of wages and consequent dissemination of comfort and happiness among the people. And this it will accom-

iness among the people. And this it will accom-lish, not for the United States alone, but for civ-lization, for it is not too much to say, Mr. Presilent, that upon the decision of this quest depends consequences more momentous than upon that of any other question of public policy within the memory of this generation in a proader sense than any other question attracting the general attention of mankind 'It is a question of civilization. It embodie the hopes and aspirations of our race. The Ac of Congress which shall happily solve it wi constitute a decree of emancipation as veritable as any that ever freed the serf from thralldom as any that ever freed the sert from thraidom.
but, more universal in its application, it will
proclaim the freedom of the white race the
world over. It will lift the bowed head of
labor. It will hush the grumbling of toil. It
will inaugurate a true renaissance—a renaissance of prosperity—without which industry,
learning, science, literature, are but the apples
of Sodom." In answer to questions, Jones said if there was a free coinage of silver, he believed in three days the silver not used for coinage would be worth \$1.29 an ounce, and that there it would

Jones to-day had the same c'ose attention from the Senators of both parties that he had yesterd y, and at the close of his speech was yesterdy, and a consequence of the Senate warmly applauded.

Jones of Arkansas next addressed the Senate in criticism of the bill. He said the bill as it stood should never become a law, but should be amended by making it provide at least for unlimited coinage of silver whenever the price reached a point at which the Government ceased to be purchaser. This was an absolute ceased to be purchaser. This was an absolut necessity, unless the purpose was to destroy si ver as money, Those who would vote for the bi as it stood certainly intended the demonetiza-tion of silver, and might as well avow it. While striking a fatai blow at the greatest body of the people, they intended only to benefit the sellers of silver bullion by increasing its price. The deliberate purpose to discredit silver Treasury notes, by refusing to make them a legal tender, suggested further the real purpose had in view by the Republican party. He was in favor of the issue of certificates for coin and bullion, and of conferring upon them qualities of legal tender as broadly and completely as it was conferred upon the coins which they represented. There was no reason why those certificates should be in any sense inferior to any other form of paper money. They were the very best form of paper money. They were the very best form of paper money, because they were rendered doubly secure by the pledged faith of the Government, and by the deposit of the coin devoted to their redemption. striking a fatal blow at the greatest body of th Teller said the Senator from Arkansas seemed The Senator was very much mistaken.

Jones of Arkansas—Members of the Repub-It can party have said to me in private conversation that this bill had been approved by every senator on that side except the Senator from

Colorado.

Harris, a member of the Finance Committee, said the bill was reported by a majority vote, and that he had no knowledge or suspicion of a caucus having had anything to do with it. The minority of that committee had, when the bill was under consideration, favored—and still favored—the absolute free coinage of silver, but the caucition of the minority of which he was the question of the minority, of which he was one, had narrowed itself down to the point of accepting the pending measure in lieu of the existing law, under which only 2,0.0,000 of silver dollars were coined monthly. The protective system dealt with conditions, not national boundary lines, excent where the presence of those national boundary lines indicated the presence so firm a believer in the laps of heredity, venturing on marriage and fatherhood of those conditions against the influence of which it was necessary to interpose the barrier of a protective tariff. Competition never created a new industry. They were created by the work of the brain, by inventors. The committee tried to do the best it could in traming the bill, but it was always not safe to rely altogether upon the testimony of beneficiaries under the law. Butterworth then proceeded to expound his views touching the reciprocity with Canada. He said we were endeavoring to cultivate relations with fifty millions of people to the southward and yet were irraid of Canada. There were some things in the bill he did not like. He had known of an industry that had been able to make \$60,000,000 in dividends on a capital of \$1,250,000. He favored protection, but these men held.

the world in their grip. When he said he did not favor that kind of protection, he was told, "You are not sound on the tariff." The time had come when some little concern should be shown for American homes and American firesides. He did not believe it wise or prudent to make such a sweeping reduction in sugar, to be supplanted by bounty. The greatest desire of his heart was to pass a bill reflecting in the highest degree the protective system. What he wanted to avoid was paying too much for an industry. Such was the case with the tin-plate duty. It would amount to fitty millions of dollars before the manufacturers of tin-plate could declare a dividend. He was anxious that Iris party should not take a false step. He did not expect to participate much in the deliberations of the House hereafter. Her Majesty's Government matter which should not be involved with as it appeared, had no such understanding and this divergence of view at the thres hold of the negotiations led to a protracted examination and discussion, and was the prime cause of the sending of Minister Tupper to Washington to assist Sir Julian. After Tupper's return to Ottawa the Government of the United States submitted the aggregate of the cost of the service pension, upon the basis of sixty-three years as the age limit, will be \$1,182,095,525. Upon the basis of sixty years the cost will be \$1,333,-109,820. A dense crowd thronged the approaches, and the guests numbered two thousand. The Lord Mayor presented to the explorer a gold casket containing an address from the corporation of London. Stanley, in returning thanks, said the Congo might have belonged to England had Englishmen listened to his lectures between 1878 and 1884. Belgium was reaping 100 per cent. England might have had East Africa, but her journalists see everything through her organs glass. Germany thing through an opaque glass. HAMBURG, May 13th.—The contract between the German Government and the East Africa Steamship Company provides for the payment of a subsidy of 900,000 marks annually. The company undertakes to maintain for ten years a main line of steamers from Hamburg to Delagoa Bay.

None of the steamers will be below 3,200 tons, and the speed shall be 10½ knots. The steamers will call at a port in either Belgium or Holland and at Lisbon, Naples, Port Said, Zanzibar and Dares, Salam. The company will also establish a coast line from Zanzibar to Lames. Another coast line will be established from Zanzibar to Inhambana.
